County Engineer

TROY BEAM
Mobility Services & Fleet Manager

March 17, 2017

Dear Home Owner / Resident:

This is an informative letter regarding a future County Highway 27 Improvement Project. Scott County will be accessing the feasibility to reconstruct County Highway 27 between County Highway 21 and County Highway 44. Tentatively, the County has programmed the reconstruction and improvements to occur in 2021.

Presently, we are commencing with preliminary work and surveys along the highway, which may include surveying onto your property. Next week, survey crews will be surveying for topographic information and locating nearby site features. Surveyors will attempt to contact you in person prior to entry onto your property. If you desire more information or discussion regarding this preliminary work and surveys, please contact me at my telephone number provided below.

Later, probably within the next 12 months, geotechnical crews will be drilling soil borings along the highway for subsurface soil data and other qualified consultants may be delineating wetlands.

We are planning that Scott County will be hosting a public open house within the next several months. In the meantime, additional information is available at <http://www.scottcountymn.gov/591/CH-27-Reconstruction>.

If any questions arise before the Open House, please contact me at 952-496-8313.

Sincerely,
Anthony Sellner
